

## What routes are changing?

---

### All Routes

The transit route structure as a whole will be changing. Details on the proposed routes, stop locations and timing points can be found here <http://brandontransit.ca/routes-schedules/route-changes> .

### Removal of City Circulars – Routes 20 & 21

A significant amount of resources are tied up in our current two City Circular routes 20 and 21. After looking at the ridership data this level of service is not warranted. We are recommending replacing these with other routes that will provide similar coverage in a more efficient way.

### South Route Addition

A route in the south end of the city was added. This 30 minute route will feed into the Brandon Shoppers Mall and allow riders in the south end of the city to travel within their area without having to go downtown. This stop would connect to four other routes, which will allow access to the downtown terminal.
