

Will there be any major changes to streets that currently have service?

The route review confirmed the ridership on Braecrest Drive and McDonald Avenue was extremely low. This resulted in us offering an alternative service option to riders in these areas. Riders in these areas will have the option to use an alternative service which will connect to the main transportation system. We have directly mailed information to customers on Braecrest Drive and McDonald Avenue to let them know how their service will be affected.

If you will be affected by the adjustments to Braecrest Drive or McDonald Avenue and would like to attend a public community consultation to specifically discuss the alternative service please send us a request. If there is enough demand, we will host a dedicated community meeting to address these changes and how they will directly affect travel in this area.
